## **Steering Group Role Description**

### **About Green Homes Sheffield**

We're a community organisation which helps local people make their homes more comfortable and more energy efficient. We run open homes events at homes that have been upgraded so the public can see what's involved and ask householders about their experiences. Alongside this we help people find trusted local companies to do the work.

You can find out more about us on our website: [www.greenhomessheffield.net](http://www.greenhomessheffield.net)

### **What does the Steering Group do?**

The steering group meet about once a month and works closely with our project coordinator Jenny Patient. The group helps with planning our events, finding funding, publicity, admin, and building our network.

### **What time commitment is involved?**

Joining the steering group would involve attending meetings and helping out with the activities of the organisation. As a rough guide, we're looking for individuals willing to contribute about 4 hours a month through attending meetings and/or other actions.

### **Are any specialist skills needed?**

Most of all we're looking for enthusiasm about what we do and a willingness to contribute as part of our team. So even if you don't have any specialist skills, we'd very much like to hear from you.

That said anyone with any of the knowledge or skills below would be particularly well placed to contribute:

- Methods for improving energy efficiency of homes
- Awareness of the importance and urgency of addressing climate change
- Marketing, publicity and social media
- I.T skills, particularly relating to our website and online booking systems
- Events management
- Fundraising, including grant funding
